

"Big 8" Ductwork Insulation

Reduce energy costs and prolong the life of HVAC systems

Whether you need to cool or warm your building, HVAC duct wrap insulation will minimize heat gain or loss as air travels through your ducts, allowing your heating and cooling systems to work more efficiently all year long. It's designed for application on all types of ductwork—circular, rectangular, or square—within residential or commercial buildings.

R-8 DUCTWORK INSULATION:

Prevents heat from
radiating **into** ducts

Lightweight &
easy to handle

Prevents heat from
escaping **out of** ducts

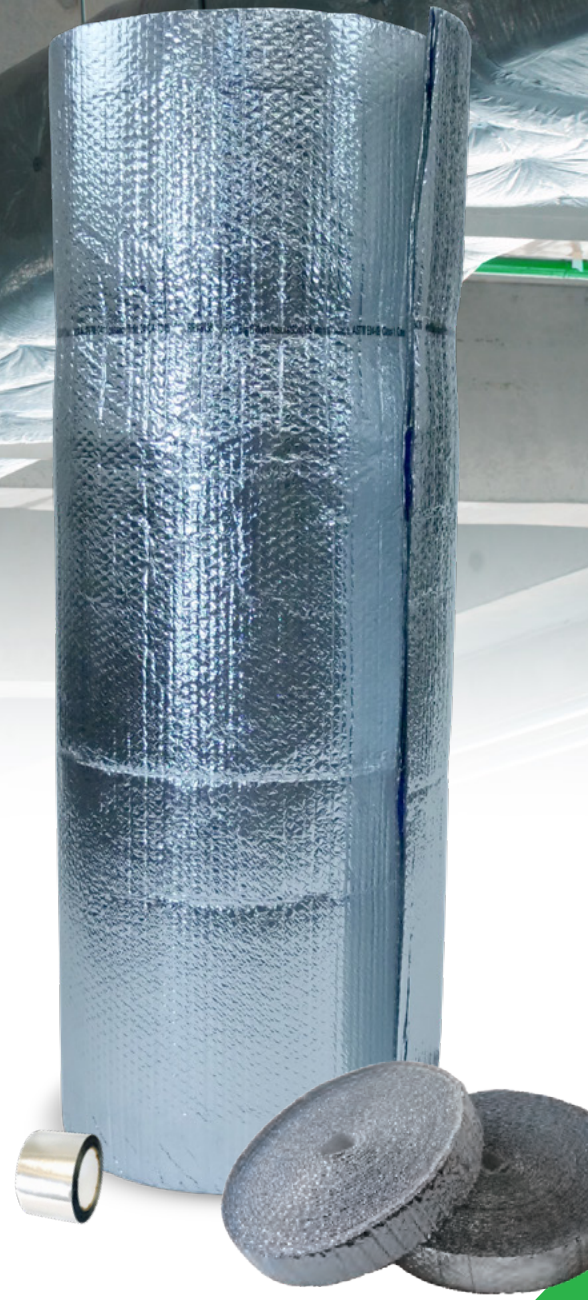

Installs quickly
& easily

R-8 HVAC Duct Wrap Insulation

4' X 50' (200 SQ FT) PER ROLL

EcoFoil R-8 HVAC Duct Insulation Wrap is specifically designed to reduce radiant heat gain and loss in residential and commercial ductwork applications. This insulation wrap also prevents condensation from forming, which is a common problem in many climates. Seal seams with Premium High Tack HVAC Tape to maintain a vapor barrier.

FEATURES:

- **EFFECTIVE**—R-Value 8 with Spacer Strips (*included*)
- **FLEXIBLE**—can be installed on round, rectangular, or square ducts (*not rated for exterior use*)
- **VAPOR BARRIER**—approved vapor barrier protection when seams are sealed with tape
- **SAVES ENERGY**—Improves HVAC system efficiency
- **CONVENIENT**—Inspector-friendly code strip
- **PREVENTS CONDENSATION**—Strategic placement of air gaps reduces contact between hot & cold air
- **EASY TO INSTALL**—No foam corner spacers needed
- **SAFE**—Non-Toxic / Non-Carcinogenic. No mineral fiber or fiberglass core... *No itch!*
- **FREE SHIPPING**—Ships fast and free with no minimum order quantities
