## Header Hanger

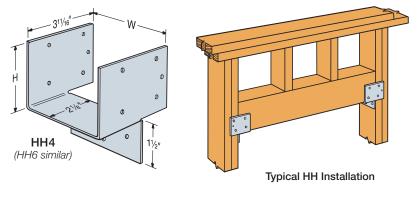

For fast, accurate installation of door and window headers and other cross members. HH header hangers can speed up the job, strengthen the frame, and eliminate the need for trimmers.

Material: 16 gauge Finish: Galvanized

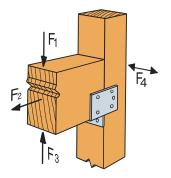

## Installation:

- Use all specified fasteners; see General Notes
- Attachment to 2x studs will result in two round holes not being filled in the studs and load reductions as noted in table

Codes: See p. 11 for Code Reference Key Chart

- Loads have been increased for wind or earthquake loading, with no further increase allowed. Reduce where other loads govern.
- 2. For 3x posts, 0.162" x  $2\frac{1}{2}$ " nails may be substituted with no reduction in load.
- 3. For SPF/HF lumber, use 0.86 x DF/SP allowable loads.
- 4. Fasteners: Nail dimensions are listed diameter by length. See pp. 21–22 for fastener information.

HH Load Directions

## **RR**

C-C-2021 @2021 SIMPSON STRONG-TIE COMPANY INC.

## Ridge Rafter Connector

An interlock provides alignment control and correct nailing locations. For a rafter-to-face connector, flatten the top flange into the face plane. The RR may be used with rafters sloped up to  $30^{\circ}$ .

Material: 18 gauge Finish: Galvanized Installation:

• Use all specified fasteners; see General Notes Codes: See p. 11 for Code Reference Key Chart

Many of these products are approved for installation with Strong-Drive® SD Connector screws. See pp. 348–352 for more information.

- Roof loads are 125% of floor loads unless limited by other criteria. Floor loads may be adjusted for load durations according to the code provided they do not exceed those in the roof column.
- Fasteners: Nail dimensions are listed diameter by length. See pp. 21–22 for fastener information.
