

Metal Screws

Self-Drilling Wafer-Head Screw with Wings

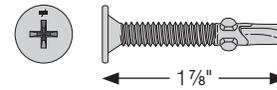

Common Application:

Attach plywood and OSB panels to steel studs

Features:

- #2 Phillips drive.
- Machine-screw thread, threaded full length.
- Wings above drill point provide clearance hole in work piece so it won't climb up the shank; wings break off as point engages the steel substrate.
- #3 drill point.
- Type 410 stainless steel is coated for additional corrosion protection.
- Type 410 stainless steel can be hardened through heat treatment, giving it the ability to drill through metal. It does not offer the same level of corrosion resistance of either Type 316 or 305 stainless steel.
- **Warning:** Hardened stainless-steel fasteners should not be used with steel framing in environments with high humidity, condensation or other moisture that will be present at the dissimilar-metal interface.

For more information on drilling thickness capacities and drill speed recommendations, see pp. 26–27.

Type 410 Stainless Steel*

Size	Length (in.)	Threads Per Inch	Head Diameter (in.)	Carton Quantity	Model No.
#10	1 7/16	24	0.45	100	F10C144WDC
#10	1 7/16	24	0.45	1,000	F10C144WDM
#10	1 7/16	24	0.45	4,500	F10C144WDB
